INDUSTRY CLASSIFICATIONS

FOR THE

CENSUS OF MANUFACTURES, 1937

The classification of reports for manufacturing establishments consists in the assignment of each to the particular industry to which it belongs in order to bring together, so far as practicable, data for all establishments engaged in the same industry or in kindred industries.

The specific industry to which a report is assigned is determined by the character of the product or class of products of chief value. This rule is occasionally disregarded, however, in order to avoid classifying an individual establishment in one industry at one census and in another at the next. To illustrate: In 1935 a certain establishment may have manufactured two general classes of products, one of which contributed 55 percent and the other 45 percent of its total value of products; but for 1937 these percentages might be reversed, the predominant class of products for 1935 becoming the secondary class for 1937. In such a case as this, in order to make the statistics for 1937 as nearly comparable as possible with those for preceding censuses, the establishment is classified in the same industry for 1937 as for 1935, unless it appears probable that the change is permanent in character.

The Manufactures classification as constituted at the beginning of the Census for 1935 embraced 310 industries. Revisions and reclassifications made between the publication of "Industry Classifications for the Census of Manufactures, 1935" and the publication of the 1935 reports changed the number of industries for 1935 to 340. For the 1937 Census, other changes have been made (see pp. 55 to 58) so that the list of classifications now embraces 341 industries.

Except for Group 2, the industries are listed alphabetically in each group and numbered from 101 in Group 1, 301 in Group 3, and so on. Thus the first figure of a 3-digit number or the first two figures of a 4-digit number indicate the group number. In Group 2, the first 3 digits designate the related-industry group and the last digit the industry within the group, except in industry-group "Apparel, Women's, Misses', and Children's, Not Elsewhere Classified," in which the second digit in the numbers for contract factories differs from that in the group number.
